

Foliar Spray & Tea Recipe

Complete Recipe	Cuttings Transplanting	Vegetative Growth			Fruiting/Flowering Period							
		Week 1	Week 2	Week 3	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8
Mix with Water		(All measurements per gallon of water)			1Tsp=5ml / 1Tbsp=15ml			Always use unchlorinated water!				
Plan "B" Organics® Sol. Seaweed Extract 0-0-17	2ml		5ml		5ml			5ml	5ml	5ml		
Plan "B" Organics® Ultra Mycho Plus™	2ml			2ml	2ml		2ml		2ml	2ml		
Foliar Spraying		Amount used depends on size of plants being fed. Aerate and agitate water for 12-24 hours with ingredients in cloth mesh bag then filter and spray. When combining more than one type of guano, be sure not to exceed more than a combined total of 2-4 Tbsp. per gallon of water.										
Plan "B" Organics® Worm Castings		7ml	7ml		7ml	7ml	15ml					
Plan "B" Organics® Ultra Compost		7ml	7ml	7ml	15ml	5ml	15ml					
Plan "B" Organics® Sol. Seaweed Extract 0-0-17		5ml	5ml	5ml	5ml	15ml	5ml					
Plan "B" Organics® Seabird 0-9-0				7ml		7ml	7ml					
Plan "B" Organics® High Nitro 8-3-1				7ml		7ml	7ml					
Plan "B" Organics® High Phos 0-12-0					7ml	7ml	7ml					
Plan "B" Organics® Ultra Bloom 5-7-4				7ml		7ml	7ml					
Tea Applications		(All measurements per gallon of water. Aerate and agitate water for 12-24 hours with ingredients in cloth mesh bag. Stir vigorously and water immediately. Use 2-3 tea applications per week as a substitute for the nutrients mixed with water.)										
Plan "B" Organics® Worm Castings		15ml	15ml	15ml	15ml	15ml	30ml	30ml	30ml	30ml		
Plan "B" Organics® Ultra Compost		15ml	15ml	15ml	30ml	30ml	30ml	30ml	30ml	30ml		
Plan "B" Organics® Sol. Seaweed Extract 0-0-17		5ml	5ml	5ml	5ml	5ml	5ml	5ml	5ml	5ml

Plan "B" Organics® Ultra Bloom 5-7-4				15ml	15ml	15ml	15ml		30ml			

Working with Plan "B" Organics® Premium Potting Soil Plants that take longer than 8 weeks to mature can continue to be fertilized past the 6th week of this feeding schedule accordingly

Plan "B" Organics® Premium Potting Soil also has charge in it so to avoid burning your garden soil, it is to be used with Ultra Mycho Plus™ water, plain water, Cal-Mag watering and/or foliar spraying.

Potting Soil ingredients: coconut fiber, compost, perlite, pumice, worm castings, seabird guano, bat guano, glacial rock dust, dolomite (pH Control), feather meal, bone meal, blood meal, alfalfa meal, soybean meal, kelp meal.

Instructions for use: Plant in moist soil & wait 1-2 days prior to initial watering. After 1st watering wait 4-7 days or as required for root growth expansion to occur. 2nd watering may be within 3-5 days or as required. 3rd watering may allow the root growth expansion and contraction to occur regularly. Continue watering on a 3 day schedule or as required. During the recommended 2-4 week Ultra Mycho Plus™ watering, plain watering and/or Cal-Mag watering, may be used as desired. Weekly foliar sprays may be applied until fruit, flower or vegetable set occurs. Transplant to larger containers required. After the 2-4 week plain watering schedule, Ultra Mycho Plus™ watering and/or Cal-Mag fertilizer teas and top dressing fertilizers may be applied as desired. Return to plain watering for 2-4 weeks or as desired prior to harvest. Ultra Mycho Plus™ watering, plain water and/or Cal-Mag watering and/ or foliar spraying may be used as desired. When using soil it states foliar times on bag as well.

Bulk Mixing Guide	Amount used depends on size of plants being fed. When combining more than one type of guano, be sure not to exceed more than a combined total of 1-2 Tsp. per gallon of soil.											
Ultra Mycho Plus™	1-4 lbs / yd			Worm Casting				10-20% total volume				
Bat Guano 8-3-1	2-3 lbs / yd			Red Wiggler				10-20% total volume				
Bat Guano 0-8-0	2-4 lbs / yd			Composted Dairy Manure				5-15% total volume				
Bat Guano 0-12-0	2-4 lbs / yd			Ultra Compost				10-20% total volume				
Ultra Bloom Guano Blend 5-7-4	2-4 lbs / yd			Teak Leaves				10-20% total volume				
Glacial Rock Dust	5-10 lbs / yd			Neem Cake				1/4 cup - 2lbs / yd				
Seabird 0-9-0	2-4 lbs / yd			Crab Meal				2-3 lbs / yd				
Seabird 13.8-11.8-2.8	2-4 lbs / yd			Coconut Coir				15-50% / yd				

Working with Plan "B" Organics® 238 Special™, I-5 Mix™ and Original Special Blend™ Soils

Plan "B" Organics® 238 Special™ Soil has charge in it, so to avoid burning your garden soil, it is to be used with Ultra Mycho Plus™ water, plain water, Cal-Mag watering and/or foliar spraying. Plan "B" Organics® I-5 Mix™ and Original Special Blend™ Soils are to be used in outdoor gardening applications. Both soils contain charge, so to avoid burning your garden soil, they are to be used with Ultra Mycho Plus™ water, plain water, Cal-Mag watering and/or foliar spraying.

238 Special™ ingredients: see page 25

I-5 Mix™ ingredients: see page 26

Original Special Blend™ Ingredients: see page 27

Instructions for use: Plant in moist soil & wait 1-2 days prior to initial watering. After 1st watering wait 4-7 days or as required for root growth expansion to occur. 2nd watering may be within 3-5 days or as required. 3rd watering may allow the root growth expansion and contraction to occur regularly. Continue watering on a 3 day schedule or as required. During the recommended 2-4 week Ultra Mycho Plus™ watering, plain watering and/or Cal-Mag watering, may be used as desired. Weekly foliar sprays may be applied until fruit, flower or vegetable set occurs.

Transplant to larger containers required. After the 2-4 week plain watering schedule, Ultra Mycho Plus™ watering and/or Cal-Mag fertilizer teas and top dressing fertilizers may be applied as desired. Return to plain watering for 2-4 weeks or as desired prior to harvest. Ultra Mycho Plus™ watering, plain water and/or Cal-Mag watering and/ or foliar spraying may be used as desired. When using soil it states foliar times on bag as well.
